

MINERAL SUPPLEMENTS

A PRODUCT FOR EVERY MANAGEMENT STYLE

Why SWEETLIX®?

With today's genetically superior animals, producers expect superior performance. The only way to attain such performance is to provide all the nutrient building blocks needed by the animal. A key component in that puzzle is mineral nutrition. SWEETLIX® offers a wide selection of mineral supplements to fit differing animal needs and production goals. SWEETLIX® stands above the competition in terms of quality assurance, palatability and flexibility.

SWEETLIX® Classic

- Formulated with the commercial cattleman in mind
- Highly palatable mineral and vitamin supplement for beef cattle
- Delivers 150% of NRC recommended trace minerals at an average 4 oz intake per head per day
- Contains a safe and effective dietary source of selenium with Sel-Plex® selenium yeast
- No additional sources of salt or minerals are required

SWEETLIX® Balanced

Most economical product option

Highly palatable self-fed mineral and vitamin supplement for beef cattle

Contains essential minerals and vitamins required by cattle for improved productivity

Contains a safe and effective dietary source of selenium with Sel-Plex® selenium yeast

Reliable, daily consumption averages 4 oz per head per day

SWEETLIX® Blueprint

- Premium trace mineral package with the most advanced nutritional technology
- Formulated to meet the needs of today's most advanced genetics and diverse production environments.
- Specifically formulated to match today's beef cattle trace mineral needs utilizing 100% organic sources from highly bioavailable Bioplex® and Sel-Plex®
- Provides mineral nutrition in a form as close to nature as possible, removing inorganic trace mineral sources
- Highly palatable to ensure consistent and proper intake formulated at 4 oz per head per day

All three tiers are made with RainBloc® weatherizing agent for improved resistance to moisture and reduced waste
